#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-10, 13-30 and 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marnay (WO 01/01893; cited by Applicant).

Marnay discloses the claimed invention including components 2, 3/4, flanges, e.g. 17, convex projection 25, concave recess 12 and the offset relationship (see, e.g., Figs. 1-3, 6 and 7, elements 25 and 12 appear to be offset in at least an anterior-posterior direction). The components have a notch, e.g., 22, 23. The flanges comprise sharp portions, e.g., 7 and shearing edges of leading end. The flanges have through holes, e.g., 21. Marnay discloses the claimed invention except, perhaps, for unambiguously showing or disclosing that the articulation features (i.e. the convex projection and concave recess) are or could be offset. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have located the articulation features at any location or distance or range of distances from an edge or edges of the device, since it has been held that mere relocation of parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70. Moreover, it has been held that where the general conditions of a claim are disclosed in

Art Unit: 3733

the prior art (e.g. an articulating disc prosthesis having articulation features located some distance from an edge), discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233. It is also noted that Marnay may not explicitly describe a bone growth promoting matieral on the device or forming the device of a cobalt-chrome-molybdenum metallic alloy. Nevertheless, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided the device with a bone growth promoting material to enhance fixation of the device to bone and to have formed the device of a cobalt-chrome-molybdenum metallic alloy for durability, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

## Response to Arguments

Applicant's arguments filed 13 August 2007 have been fully considered but they are not persuasive.

It is noted that even if there may be ambiguity or disagreement about whether the articulation features of the device of Marnay et al. are offset in a certain direction, it would have been obvious to a person of ordinary skill in the art to have located the articulation features at any desired location or distance or range of distances from any edge or edges of the device, as set forth above in the rejection.

Art Unit: 3733

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Comstock whose telephone number is (571) 272-4710. Please leave a detailed voice message if examiner is unavailable. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached at (571) 272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
